

All Access AI: The Use of AI Tools in the EFL Classroom

 Helbling Webinar Series | January 2025

Thomas Strasser

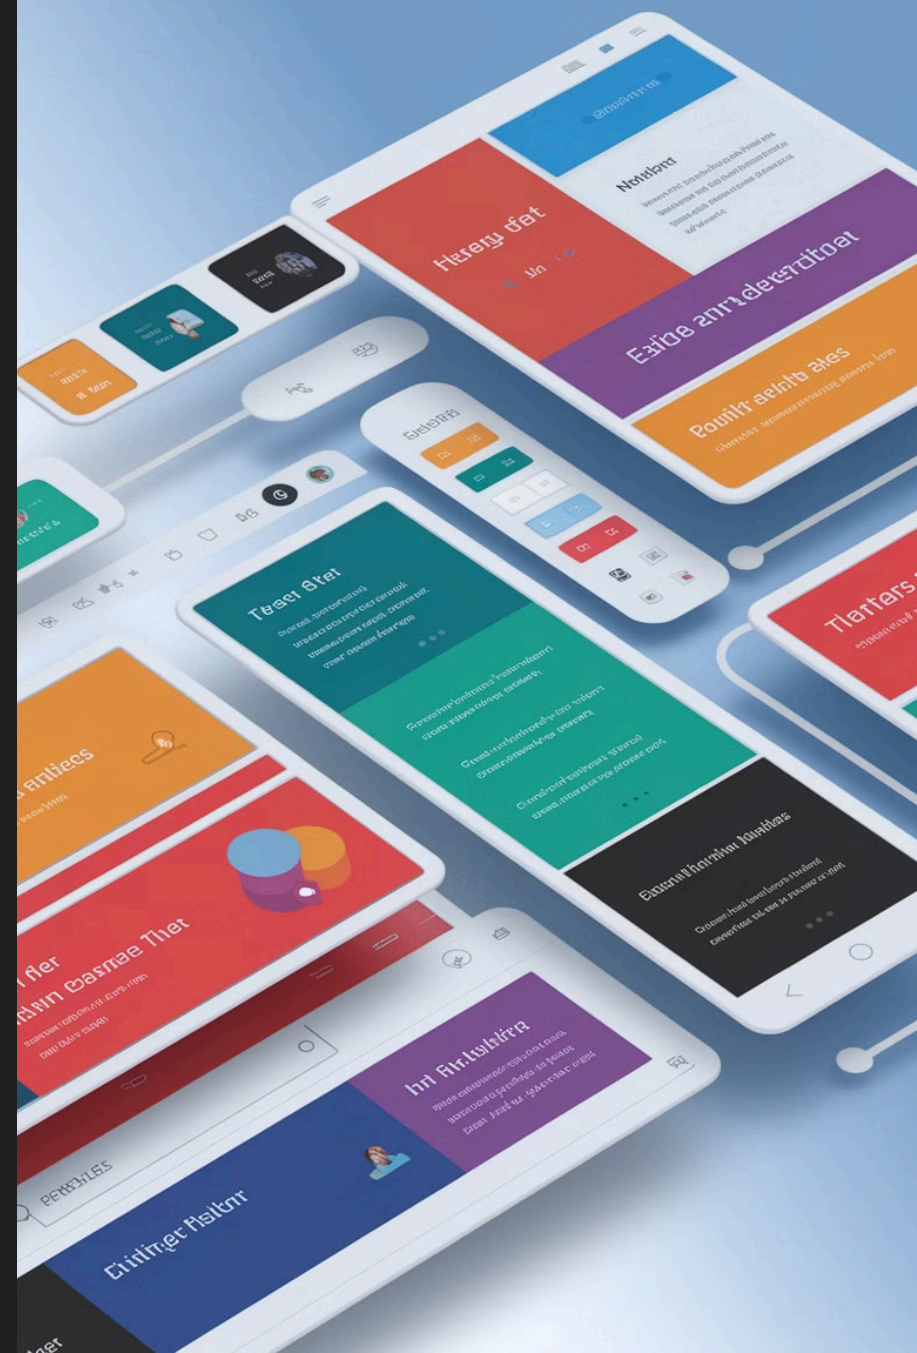

Ideas: Thomas Strasser, layout/structure backed up by gamma.app; images AI-generated (various AI-engines).

gamma.app

A powerful platform for creating interactive EFL content:

- 🎮 **Interactive Lessons:** Create engaging vocabulary matching games and dynamic learning activities
- 🗣️ **Speaking Practice:** Design speaking prompts with integrated audio recording capabilities
- ✍️ **Grammar Exercises:** Develop interactive grammar practice with immediate feedback
- 🔗 **Access:** Available at <https://gamma.app/>

gamma.app: Use Cases

Lesson planning

Design interactive vocabulary activities like matching exercises for irregular verbs or create engaging grammar practice sessions for past tense structures.

Presentation design

Build dynamic slides for teaching phonics with embedded audio clips, or create visual storytelling presentations for practicing reading comprehension.

Document creation

Develop customized worksheets with interactive dialogue practice tables and pronunciation charts for different English sounds.

Quizziz

1 Interactive Assessment Platform

Perfect for EFL teaching with features designed to enhance student engagement and learning outcomes

2 Key Features

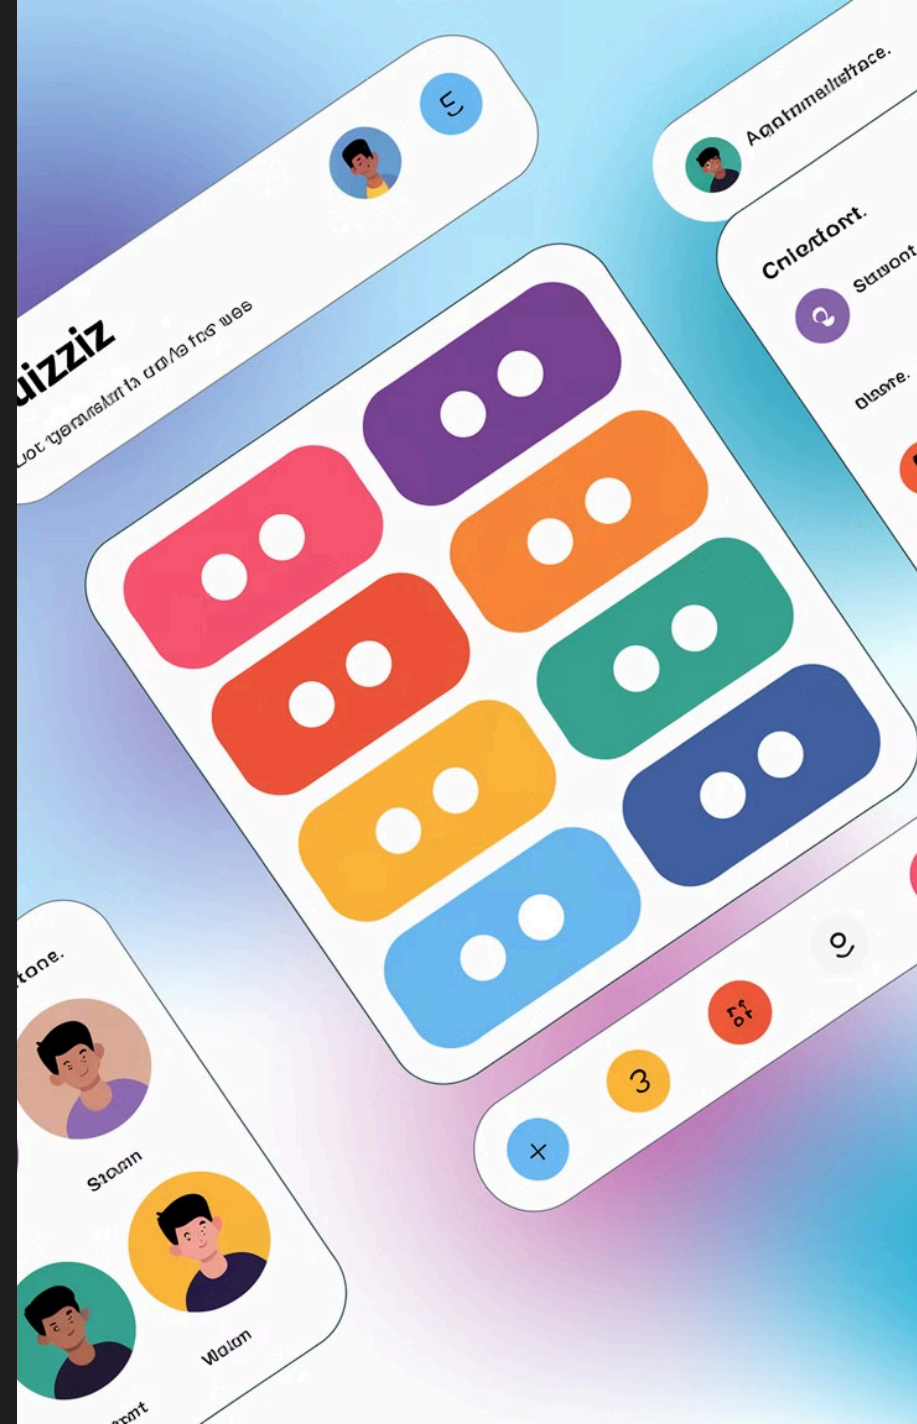

Create engaging vocabulary quizzes, pronunciation matching games, and real-time grammar competitions

3 Instant Feedback

Students receive immediate feedback on their performance, helping them learn from their mistakes

4 How to Access

Visit <https://quizziz.com/> to get started with your interactive assessments

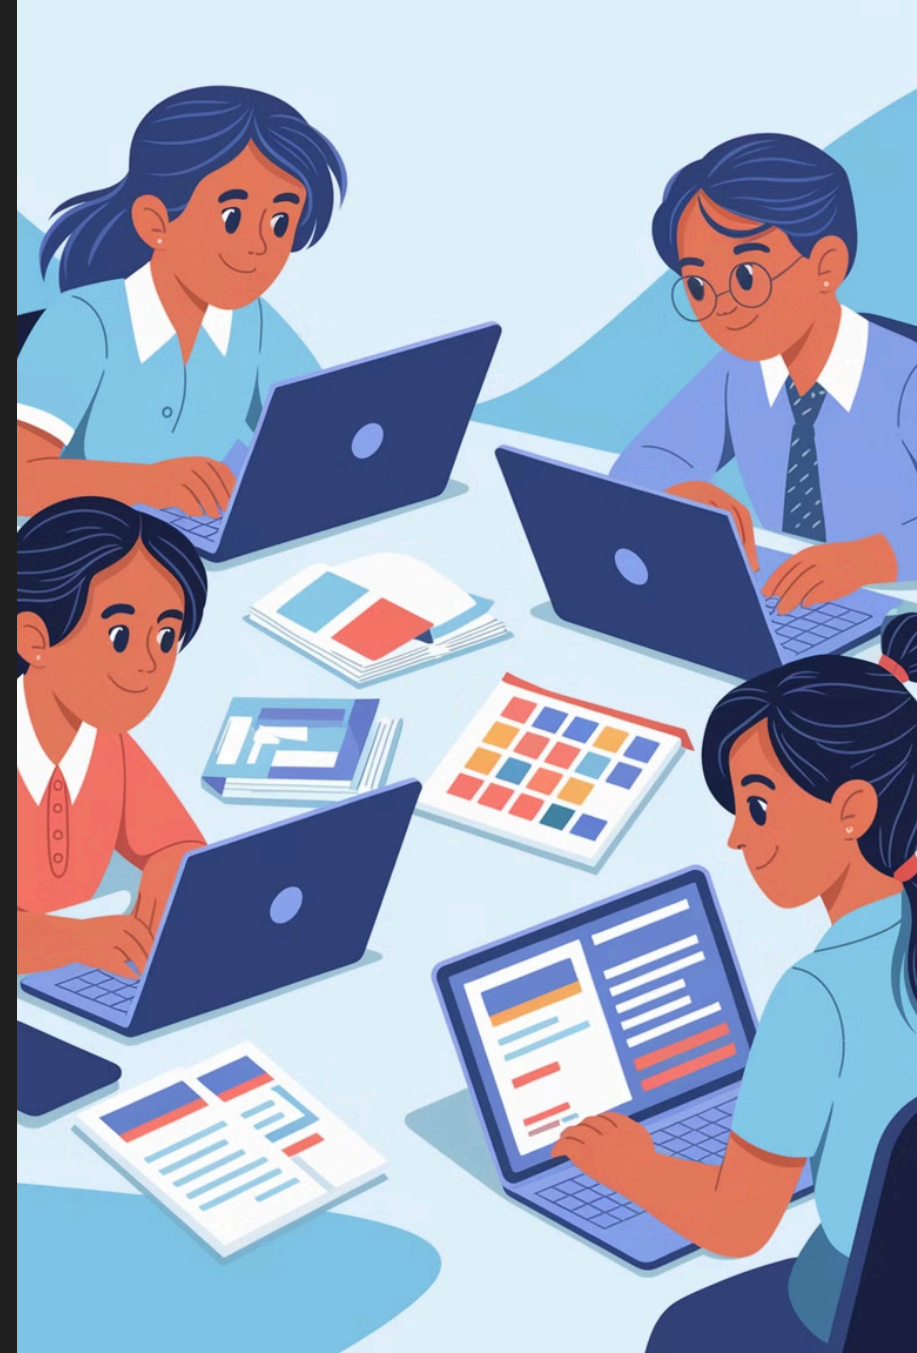

Use Cases

Create interactive quizzes and assessments

Design engaging quizzes like "Irregular Verb Challenge" where students match past tense forms to present tense verbs, with instant feedback highlighting common mistakes like "goed" instead of "went."

Gamify vocabulary and grammar practice

Transform lessons into games like "Restaurant Roleplay Quiz" where students practice food vocabulary, ordering phrases, and polite expressions through multiple-choice scenarios based on real restaurant conversations.

suno.com

🎵 AI Music Composition

Create original music tracks for classroom activities and language learning projects using simple text prompts.

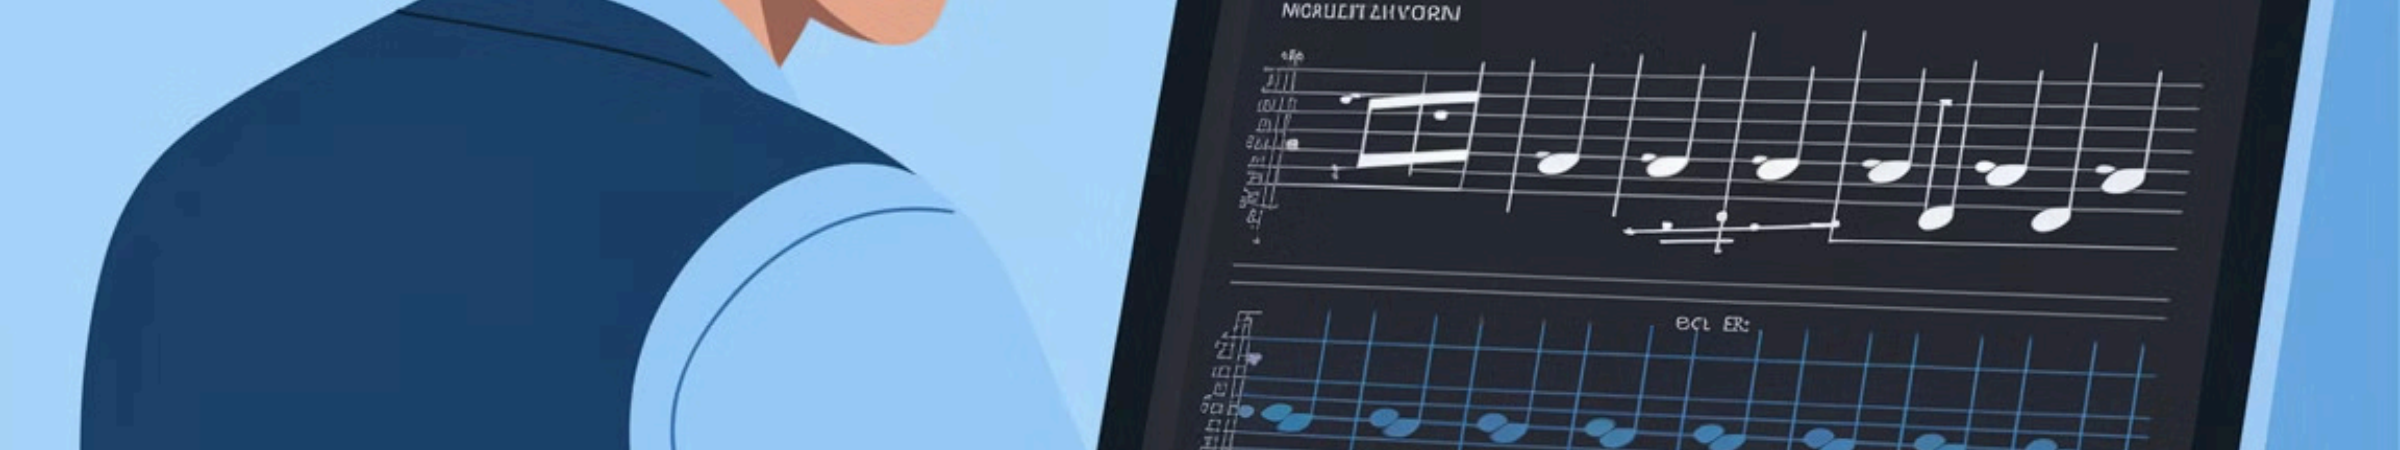

🎹 Multiple Musical Styles

Generate music in various genres and styles, perfect for creating engaging listening exercises and cultural lessons.

💻 User-Friendly Platform

Available at <https://www.suno.com/>, teachers can easily create custom music by describing the kind of song they need in plain text.

Use Cases

🎵 Compose original songs for vocabulary lessons

Create catchy tunes with simple English lyrics to help students memorize common vocabulary. For example, composing a melody about daily routines helps students learn action verbs like "wake up," "brush teeth," and "get dressed" through repetitive, memorable choruses.

🎹 Generate background music for speaking activities

Produce ambient instrumental tracks that match the mood of different conversation scenarios. For instance, creating calm background music for restaurant role-play activities helps students practice ordering food and making reservations in a more immersive environment.

curipod.com

- **Overview:** A free online tool for English language learning with interactive exercises, games, and activities
- **Content Library:** Includes ready-made resources for teachers
- **Creation Platform:** Allows teachers to develop their own custom materials
- **Teaching Resources:** Provides access to pre-made quizzes, games, and activities
- **Learning Focus:** Covers key areas including:
 - Vocabulary development
 - Grammar practice
 - Pronunciation exercises
 - Common verb tenses
 - Prepositions
 - Daily routine vocabulary

Curipod

Use Cases

- **1. 🧠 Brainstorm and visualize lesson ideas:** Map out vocabulary clusters for food-themed lessons, connecting words like "cuisine," "ingredients," and "cooking methods" with visual cues and example sentences for better student retention.
- **2. 🖥️ Design professional-looking presentation slides:** Create engaging slides for teaching irregular verbs through storytelling, using visuals to show the progression from "eat" to "ate" to "eaten" within a restaurant scenario that students can easily relate to.

fliki.ai

A platform that converts text into natural-sounding audio files, creating personalized voiceovers for language learning.

Access: <https://www.fliki.ai/>

Create Audio Flashcards

Transform vocabulary lists and irregular verb conjugations into spoken practice materials with different accents for enhanced learning.

Generate Listening Exercises

Convert written dialogues and reading texts into natural-sounding conversations for comprehensive listening practice.

Audio Grammar Guides

Transform written grammar rules and explanations into clear, memorable audio formats for better understanding and retention.

Practice Conversations

Convert written dialogues about everyday situations, like ordering coffee, into spoken conversation practice materials.

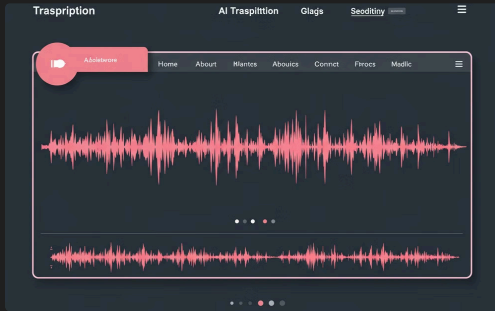

Use Cases

-  **Convert text to natural-sounding audio files**
Create audio versions of vocabulary lists and dialogues, allowing students to hear correct pronunciation of words like "thought," "through," and "thorough" which share similar spellings but different sounds.
-  **Provide text-to-speech support for struggling readers**
Support EFL beginners by converting simple stories into audio files, such as "The Three Little Pigs," letting students follow along with both text and audio to improve pronunciation and comprehension of basic English narrative structures.

turboscribe.ai

Purpose & Overview

An AI-powered transcription tool that converts EFL lesson recordings into written text, streamlining the documentation of speaking exercises and presentations.

Key Use Cases

Transcribing student role-play dialogues for providing detailed feedback on pronunciation and grammar.

Additional Applications

Converting listening comprehension exercises into written form for study materials and assessment.

How to Access

Available at <https://www.turboscribe.ai/>

Use Cases

1. Automate transcription of pronunciation exercises

Quickly transcribe recordings of students practicing English pronunciation drills, allowing teachers to analyze common mistakes in words like "thought" vs "taught" or "ship" vs "sheep" and provide targeted feedback.

2. Generate subtitles for listening comprehension

Create dual-language subtitles for English conversation videos, helping students understand natural speech patterns while connecting new vocabulary with their native language, such as showing both English and translations for idioms like "piece of cake" or "break a leg".

naturalreaders.com

This AI-powered tool transforms written text into natural-sounding audio files, making language learning more accessible and effective.

Pronunciation Practice

Convert written texts into natural audio files to help students master pronunciation and improve listening comprehension

Reading Support

Provide text-to-speech assistance for struggling readers, helping them build confidence and understanding

Personal Writing Development

Transform student-written work into audio recordings, allowing learners to hear and improve their own writing

Available at <https://www.naturalreaders.com/>

Use Cases

-  **Support pronunciation practice for EFL students:** Have students listen to naturalreader.com read authentic English texts like news articles, allowing them to hear correct pronunciation of challenging words like "thoroughly" or "phenomenon" while following along.
-  **Create listening comprehension exercises:** Convert written dialogues into audio materials using naturalreader.com, such as turning a restaurant conversation into a listening exercise where students need to identify specific orders and prices.

Character.ai

Immersive Role-Play

Students can interact with characters like a friendly barista, practicing their communication skills in a relaxed setting.

Personalized Learning

Students can have personalized conversations with characters who understand their language learning goals and offer targeted advice.

Accent Diversity

Interact with characters who speak with different accents, such as a British professor or an American news anchor, exposing learners to different pronunciation styles.

Diffit.com: Use Cases

Vocabulary Building

Diffit.com offers a wide range of vocabulary exercises and games, making learning new words more engaging and fun.

Grammar Practice

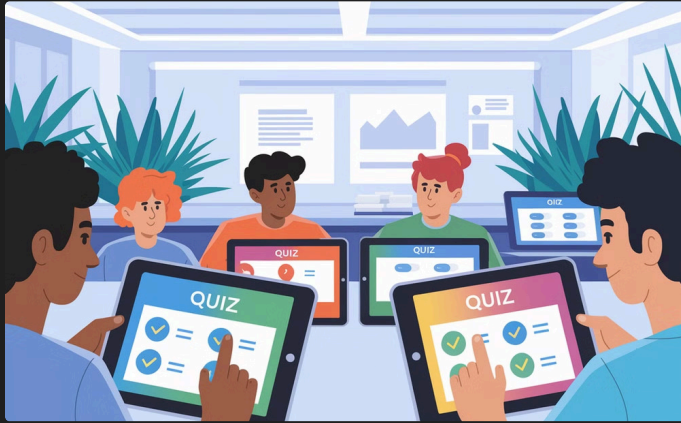

Students can test their understanding of grammar rules through interactive exercises and quizzes, reinforcing key concepts.

Personalized Learning

Diffit.com adapts to each student's progress and provides personalized feedback, fostering individual growth.

Twee.com

Interactive Quizzes

Create engaging quizzes that test students' understanding of vocabulary, grammar, and cultural concepts in a fun and interactive way.

Personalized Learning

Use Twee.com to create quizzes tailored to specific student needs and learning styles.

Real-Time Feedback

Provide immediate feedback on student performance and track their progress over time.

Mentimeter.com

Interactive Polls

Engage students with real-time polls, quizzes, and word clouds, fostering participation and feedback.

Data-Driven Insights

Gather valuable data from student responses to understand their comprehension and identify areas for improvement.

Collaborative Learning

Create a dynamic and interactive classroom environment where students can share ideas and engage in collaborative learning.

NotebookLM

Podcast Script Creation

Use AI to generate and refine podcast scripts, outlines, and show notes efficiently.

Content Research

Quickly gather and organize research materials for podcast episodes from various sources.

Interview Preparation

Create comprehensive question lists and talking points for podcast interviews and discussions.

Otter.ai

Otter.ai is a powerful tool for transcribing and summarizing audio and video recordings, making it a valuable resource for EFL teachers.

Real-Time Transcription

Otter.ai can transcribe audio and video in real-time, allowing teachers to quickly access the content of student discussions and presentations.

Automated Summarization

Otter.ai can automatically summarize key points from recordings, making it easy for teachers to review and analyze student work.

The Future of Language Learning

1

Personalized Learning

AI analyzes student pronunciation patterns and creates custom speaking exercises, like focusing on challenging 'th' sounds for Japanese learners.

2

Increased Accessibility

AI-powered real-time translation helps beginners understand complex instructions, while text-to-speech assists students with reading difficulties in comprehending English texts.

3

Enhanced Engagement

AI chatbots simulate real-world conversations, allowing students to practice ordering coffee or booking hotel rooms in English without fear of making mistakes.

Challenges

Bias and Fairness

AI systems can reflect and amplify existing biases in data, potentially leading to unfair or discriminatory outcomes in language learning.

Over-reliance on AI

Teachers must strike a balance between leveraging AI tools and fostering human interaction, ensuring that AI doesn't replace essential human elements like teacher-student relationships.

Privacy and Security

Data privacy concerns arise as AI systems collect and analyze student data, requiring careful consideration of ethical and legal frameworks.

Navigating the AI Landscape

Interactive Vocabulary Learning

Language learning apps provide dynamic flashcards and pronunciation practice for specific topics like transportation terms, making vocabulary acquisition more engaging.

Smart Content Transformation

AI transcription tools convert authentic materials like TED talks into learning resources, automatically highlighting key vocabulary for EFL students.

Creative Lesson Planning

AI-powered planning tools suggest innovative activities, such as teaching irregular verbs through storytelling approaches.

Advanced Speech Technology

Text-to-speech software offers multiple accent options for reading comprehension practice, particularly useful for daily routine contexts.

Collaborative Writing Support

Students work together on practical dialogues with real-time AI grammar assistance, enhancing peer learning and accuracy.
