

Stretch your Memory: IF things had been different....

What our student teachers would have done...

If the Corona virus had not spread across the world, I would have spent my Easter holidays with my friends. We would have spent time together in Spain. We would probably have eaten a “Paella”. We would have visited the beach and we would have enjoyed the sun. **Unfortunately**, this was not possible, so we spent our time at home.

If the Corona virus had not spread across the world, I would have spent time with my family. We would have played board games. I would have cooked a meal for my family, and we would have made a bonfire. We would have gone into the woods to get fresh air. My sister and I would have gone for a long walk. I would have visited my grandparents. **Unfortunately**, none of this happened.

If the Corona virus had not spread across the world, I would have gone skiing in my Easter holidays. I would have enjoyed the last days of the ski season in my favourite ski resort. I would have eaten a delicious “Kaiserschmarren” at the alpine hut. I would have gone backcountry skiing with my friends. We would have spent a lot of time in the mountains. We would have taken some time off, not thinking about exams, deadlines and upcoming appointments. **Unfortunately**, none of this happened because our government urged us to stay at home.

If the Corona virus had not spread across the world, I would have travelled to China. I would have seen the amazing Great Wall and I would have eaten Chinese food. I would have taken a lot of pictures for my family. I would have had a great time there and would have met new friends. **Unfortunately**, flights were cancelled all over the world and we were forced to stay at home.
