LOVE IT!

It's exciting!

It's a mix of a survival game and *Minecraft*. There's lots of fighting (but no blood*) and lots of building. "I never wanted to play a game so much in my life!" said Raphael, 14.

HATE IT!

But you can't stop!

When you finish a game, you want to play another one ... and another! Some players don't stop to eat, sleep or even to go to the toilet! "I argued with my mum because I played it during dinner time." said Max. Toni Marini is a therapist in Scotland. "I helped a twelve-year-old school girl. "She was playing the game for eight hours non-stop!"

LOVE IT!

You can play it with your friends!

You play *Fortnite* on your own or you can make a team with one person (a 'duo') or a group of people (a 'squad'). This can help your teamwork skills*. When the England football team stayed in Russia in the World Cup they played the game. "We enjoyed playing together," said Dele Ali.

HATE IT!

... But this means strangers can contact you!

You may get a message from someone you don't know who wants to play with you and talk to you. This can be dangerous.
