M8: My Fantasy Animal

NAME: Firecopa

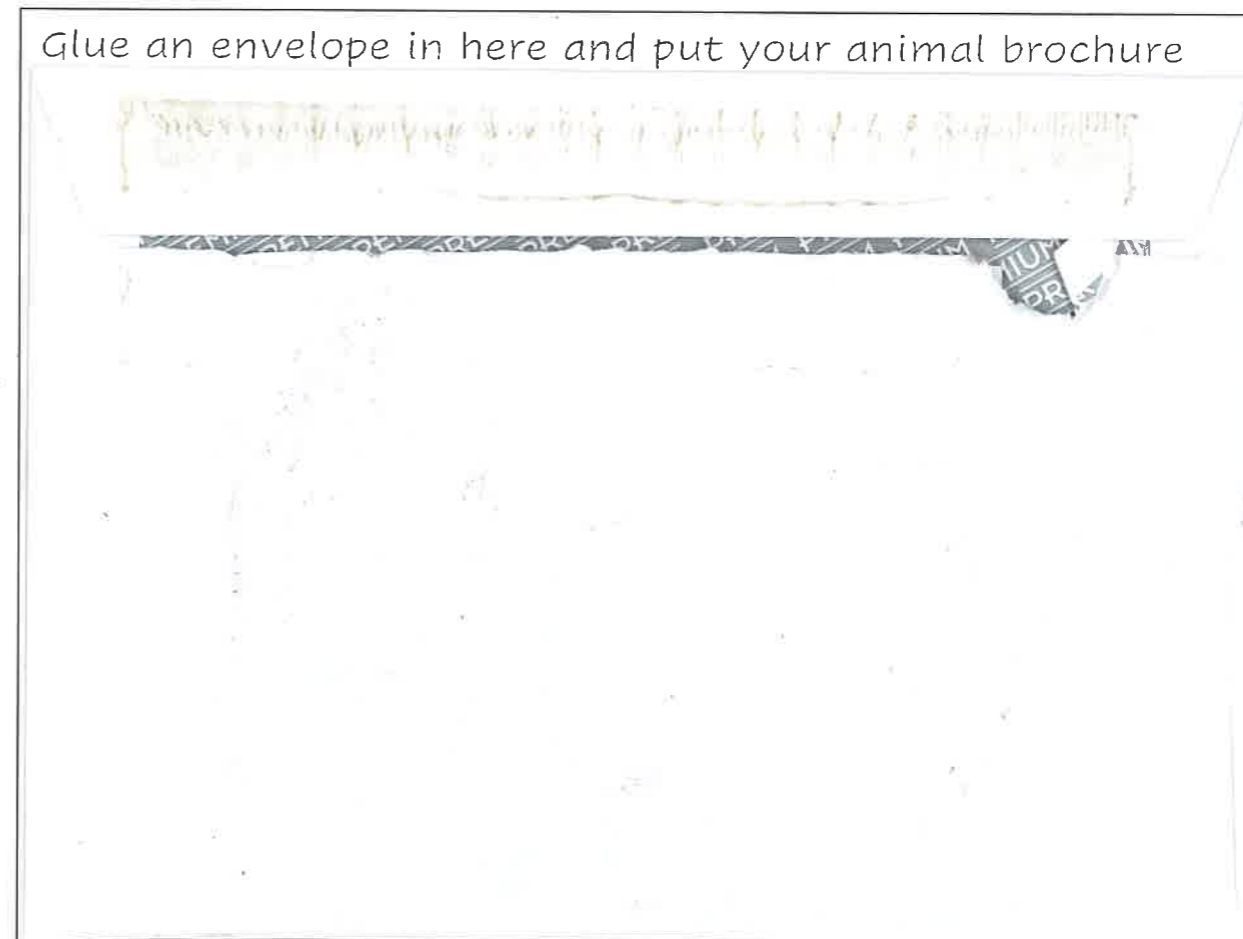

My animal brochure

Everything you need to know about this pet

Pet Info
What you need to know about

| | |
|--|---|
|  | Looks and general info All petfish are not easy to keep. They can become quite large (up to 22cm long) and weigh up to 1kg. They are black and brown and have a grey skin. All petfish live for 10-15 years. Petfish look dangerous, but they are not poisonous and do not normally attack people. |
| How do they move? All petfish need to breathe, so you should give them oxygenating bubbles. A big bubble is perfect. | Home: All petfish need a large glass tank (at least 200 litres). The tank should have a good lid. Check the bottom of the tank with newspapers. There should be space to make a cave in the tank. |
| What do they eat? All petfish eat dried crustaceans (like fish) and should feed your snake every week or two. They will eat fresh water, so you should change the water in it several times daily. | |
| Other information: Keep your petfish warm. The temperature should be 27°C-31°C. Do not let your snake water in a small tank you should feed it often. Keep it away from small children. | |

Glue an envelope in here and put your animal brochure

How do they move?

Firecopas can walk and they can run very fast but they cannot swim very well

Look:

It is bigger than a dog but it's smaller than a giraffe. It has the body of a horse but with a head of a crocodile and the legs of a black panther. It can breathe fire and they have a thorn on their foot.

What do they eat?

They eat almost everything except for avocados and fish. Firecopas are allergic to grapes. When they eat them, they can get very crazy.

Home:

They live in the Amazonas and in Romania in the woods. They quickly became extinct 20 years ago.

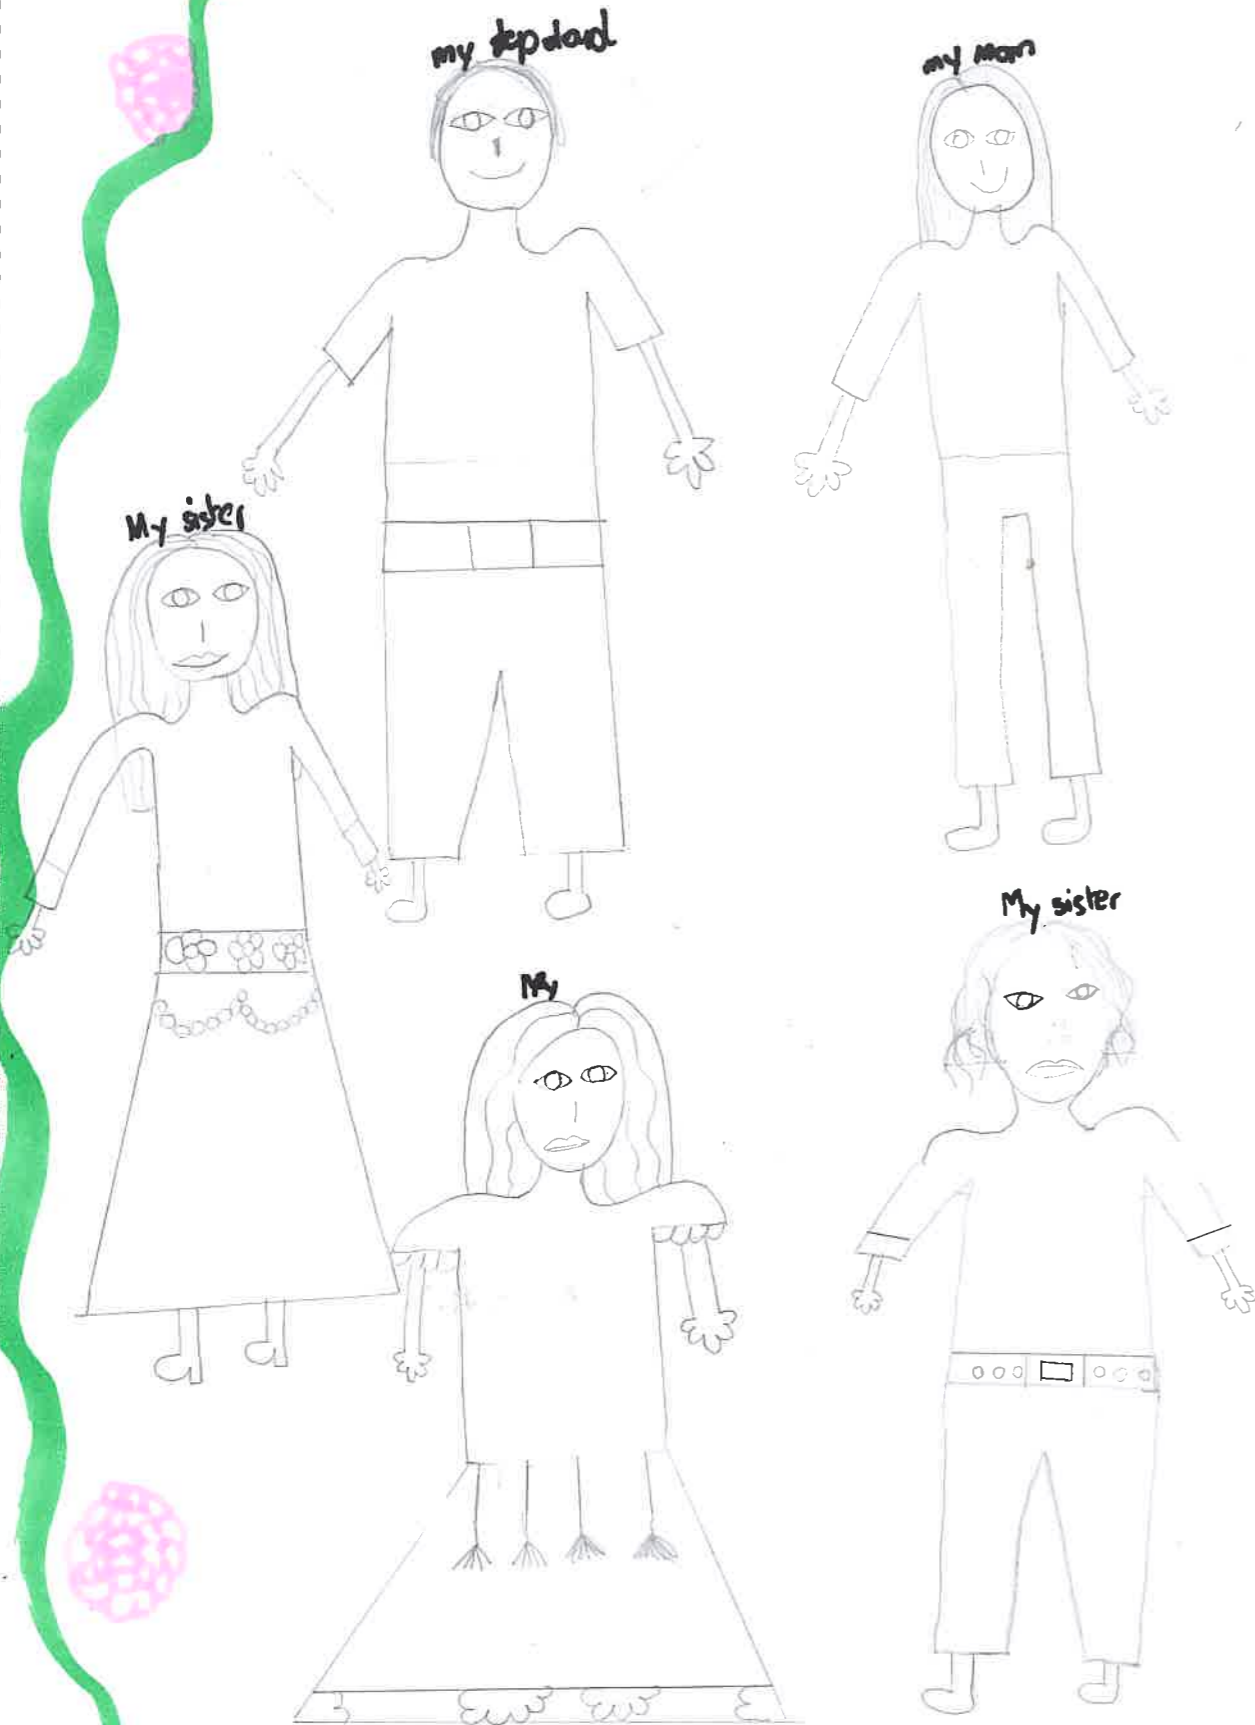

Other informations

Firecopas are one of the smartest animals in the world. They can live up to 158 years. They are very friendly.
