Task 4: The World's Tallest Man

<p>Everything I wear is made specially for me, some things in Ukraine, others abroad. For years I couldn't get much big enough gloves and socks, and I often suffered on frostbite. I only recently found a place where they can make socks that have fit me. The ceilings in our house are 2.6 metres. I can stand upright, but I have become used to avoiding of lamps. I'd love to move around more, and to travel. But my size and my financial situation are big constraints. Three years ago I went to Germany. I found out it interesting, but it was torture. I went driving by bus and it took 38 hours to get back. It was terribly cramped and I swore I'd never even take another trip outside Ukraine unless the conditions were not more bearable. Coming home after seeing how well all people live in Germany was also tough. I'm still not get used to being so tall. It's caused me many problems. All my life I've dreamt of being smaller than, of being like everyone else and having a normal life. The only advantage to my size is that I can pick up apples and redecorate the ceiling without a ladder.</p>	✓	0
