## Deception

This fun guessing game teaches students how to use the present perfect to talk about experiences.

Before class, make one copy of the worksheet for each student.

### Procedure

Hand out a copy of the worksheet to each student.

Tell the students to write down twelve present perfect sentences about things that they have and haven't done in their lives using the verbs in the box.

Explain to the students that some of the sentences should be true and some should be false. The students should try to write sentences that will be hard to guess.

When all the students have finished, ask them to cut out their true and false cards.

Next, split the class into groups. Each group will play against another group.

The groups playing against each other must have the same number of group members. Groups of three or four work best.

Give one piece of paper to every two groups to keep score.

The two groups sit opposite each other. They then decide which student will go first. This student reads one of his or her sentences.

Then, the opposing group's players each put down a true or false card depending on whether they think the statement true or not.

Then, the student reveals the answer. The opposing group gets one point for each correct guess.

Then, the other group says one of their sentences and so on.

This continues back and forth with one group giving a sentence and the other group guessing whether it is true or false, until all the sentences have been used up.

The winning team is the one with the most points at the end.
