now. We all went to work when the author then showed us the places where the kids were to be dug. I dug my shovel in the ground, with all my strength, feeling happy after a couple attempts. I finally managed to achieve a crack in the floor. I dug the hole all day. Every time holes are dug and they are finally finished. I was happy. I had a surprise. The digging of even floor - long I had been digging. My feet were working. I was as well as my hands. I was happy. I was happy. I was even more. I went to school, when in the game room and finally to dinner. Another day passed.
