he has done something terrible. The psychic says, that Francis Tumblety is the Murderer. When Tumblety suddenly flew to America, the murders stopped!

He most likely is "Jack the Ripper"

Jack the Ripper

The settings

Whitechapel and Spittlefield were the slums of London in the Victorian Times. About 80.000 People lived in this area and under very bad conditions. They lived in a tentament that was as big as a normal classroom. In that room there lived about 50 people, sharing 15 Beds! In east London were 3 classes. The first ones are the poor. Workers, builders, tailors, decors and labourers. Then there were the very poor. Mainly children and women and they were washing clothes from the poor and scrubbing the houses! And the third class were criminals, semi criminals — who just want to survive and bad criminals who kill everybody! Crime was very common, because in this area he police isn't responsible! It happens so often that nobody noticed the death of Emma Smith. This was maybe the first attack of Jack the Ripper!

GHASTLY MURDER ON THE EAST-END

Yesterday a man found a woman mutilated in front of Mrs. Richardson's house.

On Friday afternoon a dead body was found in Buck's Row around six o'clock. Mr. Davis, the lodger living in this house was just was coming home when he saw the corpse. It was a woman. She was lying on the ground her body had been ripped open and the throat had been cut with a knife and her organs were lying all over the place. A curious and disgusted crowd gathered around Mrs. Richardson's house and around the mortuary where the body was quickly taken.

The woman was a prostitute and after finishing her job she was on her way back home. The woman was about 45 years old, 5 feet tall, she had blue eyes, dark-brown curled hair and two of her lower teeth were knocked out. If one of your female relatives is missing and fits the description, please come to the police. In the last few weeks, there have been many murders of the same kind!

My Verdict

My personal Prime suspect is Francis Tumblety. He killed five women. They were all prostitutes. He was a Quack doctor, so he knew about anatomy. His motive was that he held a gruesome collection of wombs, so this could be the reason why the bodies were ripped open and the wombs and organs were taken out. He never cared about what other people thought of him, so he had no friends and nobody would notice if he is gone in the night! The psychic also said that he was "*Jack the Ripper*"

Tumblety was in London at the time the murders began. He fits the description of a strange man, lodging in London at that time. He hated women and Tumblety had two rings on his fingers that were similar to the one on one of the victim's. He lived near the murders places and said that he also had knowledge of surgery. When the psychic thought of Tumblety, he wanted to throw up, that means

George Chapman

Age: 23 years

Motive: poisoned three of his wives => didn't like to breakup

Information: studied surgery, Polish immigrant, when he left country, then murders stopped

Francis Tumblety

Age: 55 years

Motive: he had a collection of wigs and hated women

Information: gay, disappeared from view then murders stopped, lived in the area, Quack Doctor

My suspects

I think it was Francis Tumblety. He was a Quack Doctor, so he knew a lot about human anatomy. His motif was that he collected wombs so he would just have wanted to get another one. Tumblety didn't care about what other people thought of him.

When Francis Tumblety left London the murders stopped.

But there was also another man who could have done these murders: Aaron Kosminski. He was the favorite suspect of two prominent policemen in London. He was Jewish and had a history of mental illness. He had weapons and Kosminski was a very sad and weird character. He also had mental problems.

Those two are the most likely ones who could have been Jack the Ripper!

My Victims

1. Emma Smith (31 April)

widow, presticide, drunk, attacked in brick lane, badly cut, stab wound, earring rubbed

2. Martha Tabram (6 August)

Seedy presticide, drunk, found on staircase, throat cut, stab wounds, ripped open

3. Mary-Anne Nickles (31 August)

throat cut, presticide, ripped open, drunk

4. Annie Chapman (8th September)

presticide, prostitute, walk home later found, murderer broke her rings, mutilated body

5. Elizabeth Stride (8th September)

the survivor after Annie Chapman, kidneys missing, throat cut, presticide

6. Catherine Eddowes (11 November)

kidneys missing, 6 pieces of soap, presticide

The Suspects

Thomas Cutbush

Age: about 40 years

Motif: escaped from mental hospitals

Information: nephew of police chief, stabbed two presticides in the back, got syphilis from them, broken

Aaron Kosminski

Age: 23 years

Motive: history of mental illness, weapons, lived in the area

Information: Jewish, weird character, single, violent history, favorite suspect of her fellow officers

Montague Drutt

Age: 31 years

Motive: sacked from his job (teacher)

Information: strangled himself in his Thomas and has the murder weapon, gay
